

The International Authorized Version

Information Document

The International Authorized Version has been under development for decades. Some of its key features are:

1. It agrees with the King James Bible *perfectly*.
2. Unlike all other modern translations, it *proves* that it agrees with the King James Bible perfectly through its PDL (Prepublication Development Library), which will be provided to all. For example, the PDL explains why “love” means the same thing as “loveth” to the modern English reader.
3. It follows the most advanced Greek text ever compiled.
4. It does not give priority to, though it does not merely ignore, the defective Alexandrian texts followed by the New International Version and the New King James Version. New discoveries in Biblical Textual Calculus have brought to light additional problems with the Alexandrian texts.
5. Finally, for now, *we have thought of everything*.

We will be adding to this information document as the need arises.

Cordially,

Dr. Michael J. Bisconti
